Subject: Microsoft Settlement

I think that Microsoft has great software at a reasonable price. If the government went after drugs dealers the way they went after Bill Gates there would be no drug problem in the United States. Settle this case before we go broke spending all of the taxpayers money. I think president Clinton made a mistake when he deregulated the Cable TV industry. My bills have gone up every year since he Deregulated and I've noticed that Time Warner cable has brought up most of the little local companies and that's a monopoly.
